INSTALLATION INSTRUCTIONS

GaGa Ball Pit

APS-GaGaPit 15
 (24) 100-border12"
 & (12) 100-GaGa
 Stanchion

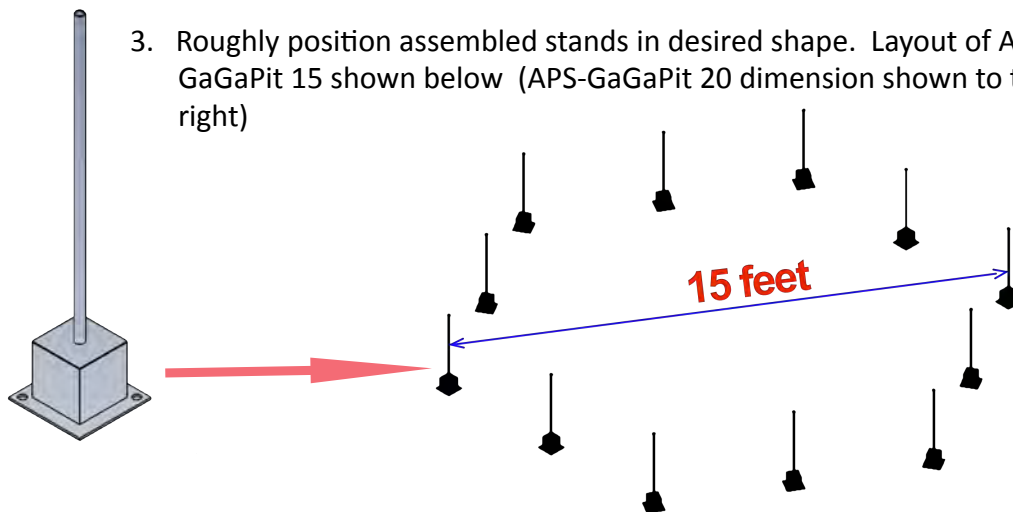

APS-GaGaPit 20
 (32) 100-border12"
 & (16) 100-GaGa
 Stanchion

APS-GaGaPit 26
 (40) 100-border12"
 & (20) 100-GaGa
 Stanchion

1 Assemble Stanchions

1. Check shipment contents against BOM.
2. Assemble all but one of the 100-GaGa Stanchion as shown in the schematic below.
3. Roughly position assembled stands in desired shape. Layout of APS-GaGaPit 15 shown below (APS-GaGaPit 20 dimension shown to the right)

1
 ASSEMBLE
 STANCHIONS

2
 ASSEMBLE
 BORDERS

3
 ORIENT WALL AND
 TIGHTEN ALL BOLTS

2

Assemble Borders

1. Begin assembling the borders with the bottom layer ensuring the overlapping connecting system is intact. The most difficult part is making sure the borders connect with the “over under” portion of the assembly.
2. Position “final” unassembled 100-GaGaStanchion for the end position.
3. Continue assembling top row of borders.
4. Insert rod portion of stanchion through the final border connection and secure to stanchion base.
5. Loosely tighten all washer/bolts at border connection.

3

Orient Walls and Tighten all bolts

1. Maneuver borders to final desired position/layout (See the options shown below and to the right.) The layout can be circular or have more defined straight edges like a polygon.
2. Completely tighten all bolts till they are snug, and then turn an additional 1/2 turn.
3. If permanent installation is desired, you can secure completed stanchions with anchoring method of your choice. (Anchors are not supplied)
